

THE ARCHITECT SERIES

MANTELS

REAL WOOD OR NON-COMBUSTIBLE

HANDCRAFTED IN THE USA

From Georgian Elegance to Contemporary Lines

A CURATED COLLECTION OF MANTEL DESIGNS REFLECTING CENTURIES OF ARCHITECTURAL STYLE.

The Architect Series features three mantel designs that suit traditional, transitional, and modern homes. Clean profiles, subtle detailing, and refined proportions create understated sophistication, equally at home in historic properties and contemporary interiors.

Two construction options provide flexibility: **WOOD** models, with fine veneers and classic millwork for authentic texture, and **NON-COMBUSTIBLE** models, engineered for heat resistance and safe TV placement above the hearth.

MODERN

CHERRY WOOD

WALNUT NON-COMBUSTIBLE

Available in **WOOD** or **NON-COMBUSTIBLE**, the Classic fireplace mantel embodies the look of a smooth sanded wood beam, perfect for traditional or rustic fireplace designs.

This sleek fireplace mantel presents a clean, tailored aesthetic enhanced by tasteful, nuanced details. Its minimalist beam mantel styling complements Georgian, Federal, and Mid-Century Modern interiors alike.

FEDERAL

Available in **WOOD** or **NON-COMBUSTIBLE**, the Federal fireplace mantel features iconic dentil molding, elegant curves, and delicate beading, all signature elements of Federal-style architecture.

This transitional mantel shelf is perfect for colonial-style fireplaces, offering refined minimalism with historical detail.

AVOCADO NON-COMBUSTIBLE

HORIZON

Available in **WOOD** or **NON-COMBUSTIBLE**, the Horizon fireplace mantel offers sleek, contemporary lines that enhance linear

fireplace installations. Its slim profile creates a modern floating mantel shelf look, perfect for minimalist and modern interiors. This modern mantel shelf is designed to bring subtle architectural interest without overpowering your space.

This elegantly simple mantel shelf offers a slim 3" profile, with a 4" or 6" projection (depth).
