ECO-FRIENDLY GRILLING FOR MULTI-USER ENVIRONMENTS

At the heart of every multifamily development lies a vision of sustainability, innovation, and community. The E27T Grill was crafted to bring this vision to life, offering an eco-friendly grilling solution that harmonizes with the goals of multifamily architects and designers. Tailored for communal spaces, the E27T Grill helps meet all-electric building city ordinances while enhancing outdoor grilling experiences.*

COMPLIANCE WITH GAS RESTRICTIONS

As cities continue implementing gas restrictions and greener initiatives, the PGS Electric E27T Grill offers a sustainable alternative without compromising performance or flavor.

SUSTAINABLE AMENITIES

Designed for modern multifamily developments, the Electric E27T Grill enhances sustainable living with zero direct emissions, providing an essential amenity that aligns with the values of eco-conscious, next-generation communities.

ENGINEERED FOR MULTIFAMILY

Equipped with a one-hour safety shutoff timer, the Electric E27T Grill minimizes energy waste and boosts safety by preventing unattended use. Its durable design ensures reliable performance, even with the heavy demands of busy, multi-user environments.
